

SFC Campus Map

Shonan Fujisawa Campus

Why not stop by on your break ?

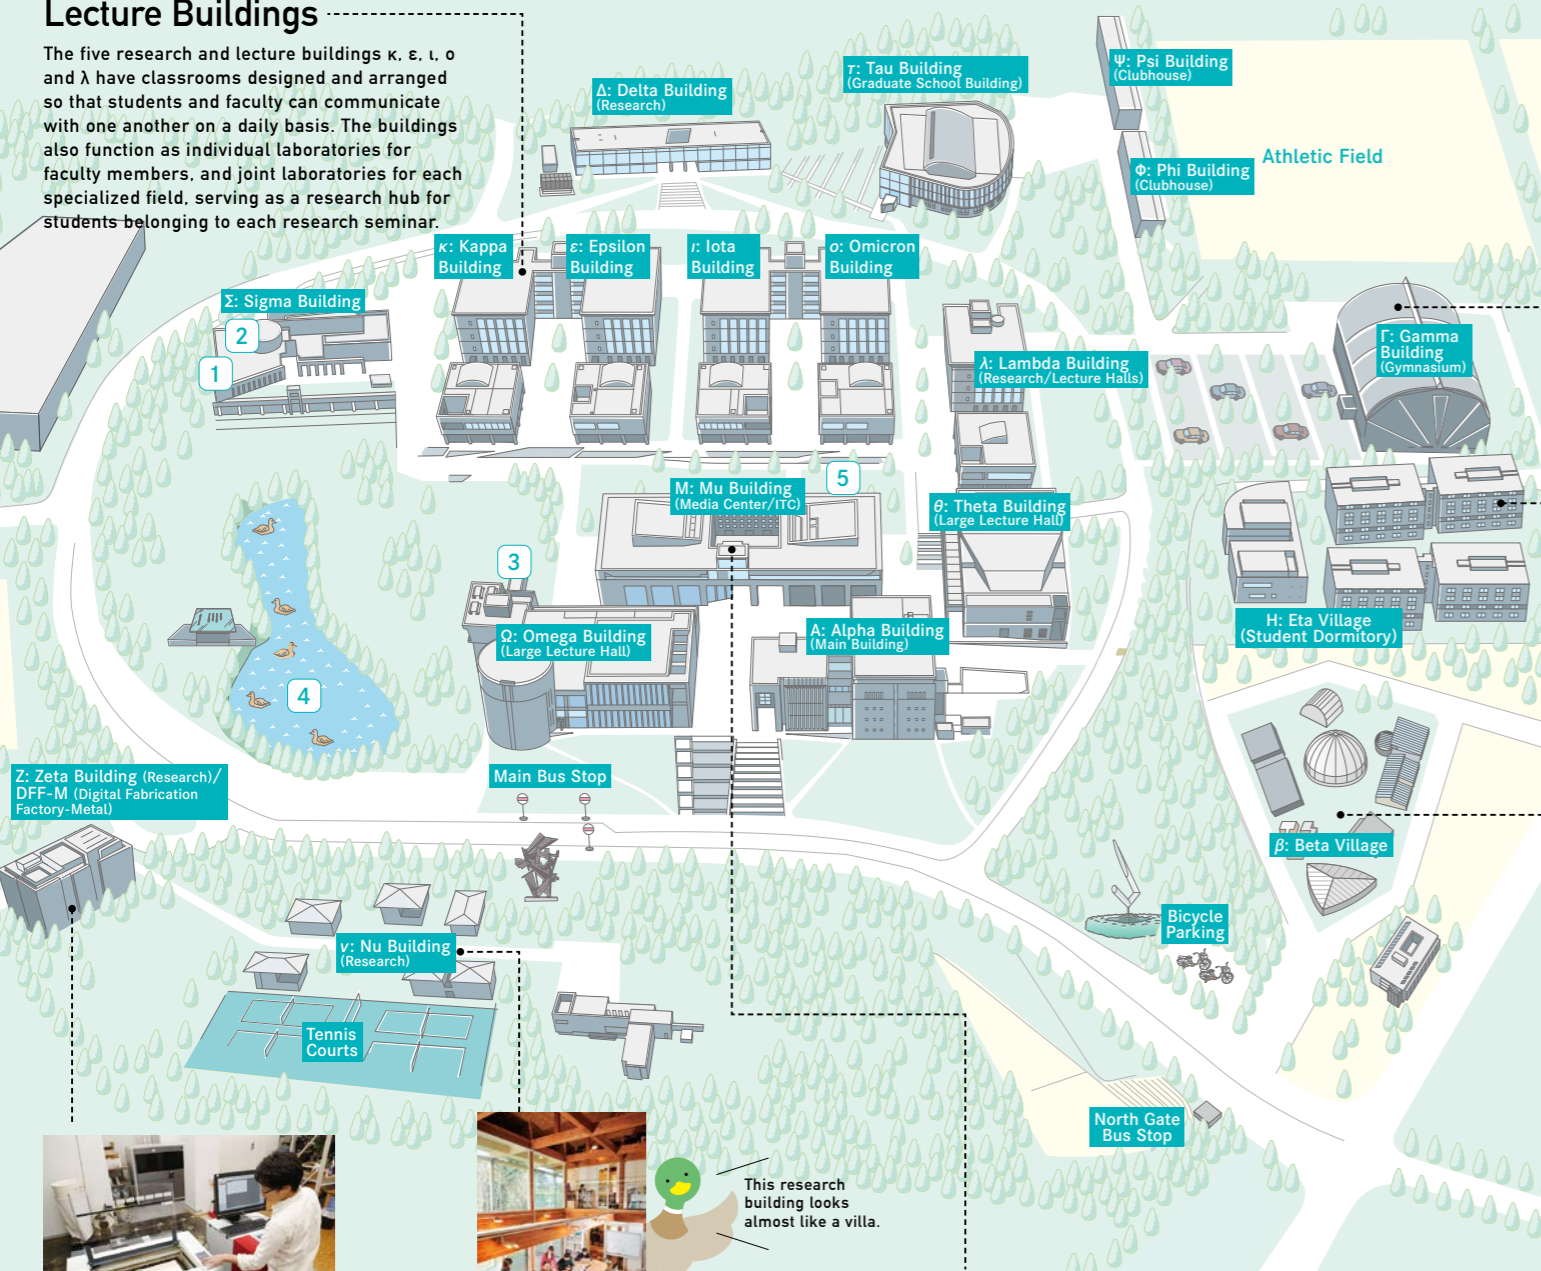

Where around 5,000 students study among state-of-the-art facilities and nature

SFC is surrounded by 330,000 square meters of nature and equipped with state-of-the-art facilities and a high-speed network environment.

Research and Lecture Buildings

The five research and lecture buildings κ, ε, ι, ο and λ have classrooms designed and arranged so that students and faculty can communicate with one another on a daily basis. The buildings also function as individual laboratories for faculty members, and joint laboratories for each specialized field, serving as a research hub for students belonging to each research seminar.

Gymnasium

The first floor of the building has a fitness training room equipped with treadmills, weights and exercise bikes. Kendo and Judo halls. The second floor accommodates the volleyball, basketball, badminton and table tennis courts. It also has a fitness room for activities such as dance. Showers and locker rooms are also located here.

β Village

The β Village is a live-in research facility where students, researchers, and faculty from various backgrounds converse, debate, and tackle global issues together. The Student Built Campus (SBC) project involves students in the construction of the institute from the very first stages of planning.

H Village

The H Village is an on-campus dormitory housing around 300 students. Five students will live together in one unit, allowing them to experience a "learn while you live, and live while you learn" lifestyle. Anyone is welcome to have lunch in the dormitory cafeteria.

Faculty of Nursing and Medical Care

This building is mostly for students in the Faculty of Nursing and Medical Care and the Graduate School of Health Management. It has classrooms, training rooms, a cafeteria, a store, and a library.

SFC-IV

The SFC Innovation Village (SFC-IV) is a facility that assists entrepreneurs and promotes a partnership between small and medium enterprises, Keio University, and regional organizations.

Fab Campus

SFC has a variety of machines for fabrication placed throughout the campus. SFC's unique ICT System turns the entire campus into a smart environment that creates a cycle of fabrication experiments. Media Center: Fab Space (3D Printers, Laser Cutter, Digital Embroidery Machine, etc.), Z Building: DFF-M (Metalwork crafting facility), O Building: Architecture and IoT devices (Digital construction and robotics), β Village EAST Wing: DFF-W (Wood crafting facility) https://fabcampus.sfc.keio.ac.jp/index_e.html

This research building looks almost like a villa.

Shonan Fujisawa Media Center (Library)

The Media Center provides a rich collection of books and a wide variety of digital contents to support research and education. Be sure to take a look at the full range of facilities, including Group Study Rooms and creative spaces such as the Fab Space.

1 Student Cafeterias

The student cafeteria and a convenience store are located on the basement floor. On the first floor "Ladybird," a cafe-style restaurant, is located next to the faculty and staff cafeteria "Tablier" and serve original pizza and pasta.

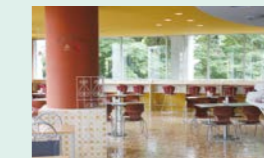

Miso ramen

Co-op Cafeteria

Vegetable curry (vegan)

Ladybird

Pork Cutlet Bowl

2 Keio Co-op Store

They have halal food items as well!

Book corner

The Co-op Store sells books, computer supplies and peripherals, and stationery. The store also has a ticket counter for ticket reservations, driving school registrations, and such.

3 Kamoike Terrace & Subway

The Kamoike Terrace & Subway looks out over the Gulliver Pond (Kamoike). It is a great place for students to gather and relax.

Shrimp & Avocado

4 Gulliver Pond

Students often eat lunch or bask in the sun on the grass next to Gulliver Pond, commonly known as "Kamoike."

5 A statue of Fukuzawa

A statue of Fukuzawa Yukichi, the founder of Keio University, stands in the center of the campus.

You may enter the facilities, common areas, and the Media Center (library). Note that you are not permitted to enter any of the classrooms and research rooms. You are not allowed to take photos in the Media Center.

Annual Schedule

A Day at SFC

7:00

I wake up, have my morning coffee, and read the news. I live at a dorm near the station, so depending on the weather, I take the bus or ride a bike to campus.

9:00

As a Biomedical Science student, I have a mix of classes in English and Japanese. When I don't have on-campus lectures, I take my online classes in a group study room at the Media Center or, on sunny days, I sit by Kamoike. Every inch of SFC is a classroom in itself!

12:00

Every student's favorite time of the day: lunch break! I meet up with my friends and we take turns trying out menu items at the cafeteria, Ladybird café, and Subway.

13:00

During my free periods, I like to go to the campus gym to take a break from schoolwork. I find myself concentrating in lectures better after a good workout! Other times, I do volunteer work for Japanese organizations that equip disadvantaged sectors with the opportunities they need to incite positive change.

15:00

The Advanced Biosciences Seminar meets twice per week! On Tuesdays, expert scientists present a wide array of leading research and scientific frontiers for us to widen our horizons. On Fridays, I consult my professors to discuss research opportunities as well as my own experimental activities.

18:00

I like to keep busy with extracurriculars, too! I serve as the Vice President of the Association for International Students (AIS), as well as a member of the Kenyukai Kendo circle.

20:00

After a long school day, I unwind by listening to jazz music, watching lifestyle vlogs, and having dinner with friends at the dorm cafeteria. I also get in touch with loved ones from back home to complete my day!

While the Keio education gives me the push and skillset I need to be in the forefront of the sciences, it is in SFC where I am presented the opportunity to see the world differently.

I've always known that I wanted to be a scientist, even before matriculating to SFC, but what I didn't know was that science could be examined from lenses other than technical — especially when it comes to exploring and experiencing the fields of neuroscience and bioinformatics. My professors and research mentors have instilled in me the great value of childlike wonder to approach the world, and to be humane to solve its problems.

Keio has taught me to dare mighty things, in the hopes that, in the great that we create, we can influence the future.

Lianne

Faculty of Environment and Information Studies
Enrolled in 2020

Keio University

Keio was Founded in 1858 by Yukichi Fukuzawa.

Fukuzawa visited America and Europe, and is known as a pioneer of Japan's modernization.

He emphasized the importance of freedom, equality, and lifelong learning.

Keio began as a school for Dutch studies, then shifted to focusing on English.

Keio is known for being the first institution to introduce many modern education systems in Japan.
