2024年4月 慶應義塾大学 総合政策学部長 環境情報学部長 政策・メディア研究科委員長 Keio University Faculty of Policy Management/Faculty of Environment and Information
Studies/Graduate School of Media and Governance
Now accepting applications for full-time faculty member in the field of information and

communication technology (fixed-term, tenure-track)

The Keio University Faculty of Policy Management, Faculty of Environment and Information Studies, and Graduate School of Media and Governance are seeking a full-time faculty member (fixed-term, tenure-track) to teach in the field of information and communication technology.

Cyber civilizations, which are predicated on information and communication technology, are unlike previous civilizations in that they allow people to connect beyond geographical and temporal constraints, and as such, digital information has become as valuable as or more valuable than physical materials. In such a civilization, the key human resources are those who have great command of information and communication technology and utilize the ability to build a new civilization on top of the present one. Since its inception, SFC has produced human resources who have pioneered a new society that is based on information and communication technology. These diverse individuals range from those who conduct research on information and communication technology, those aspiring to do business by applying the technology, to those who devote themselves to building social systems that are premised on the technology, such as developing legal frameworks. To this day, we promote future-oriented education and research in fields including the next-generation internet, cyber-physical systems, and the quantum internet. To take our campus to new heights, we seek a faculty member who can: (a) engage proactively in new, innovative research and development by building on the cutting-edge information and communication technology in a global, interactive environment; (b) demonstrate high aspirations and advanced abilities to support people's lives and push society in a better direction through the R&D activities; and (c) foster human resources equipped with the competencies described above. We seek applications from educators/researchers who envision a new civilization, such as the spread of generative AI and a society utilizing quantum computers that will be researched further.

Keio University promotes diversity based on its Charter for the Promotion of Equity, Diversity, and Inclusion. The university will ensure that no individual will be subject to discrimination because of their age, gender, sexual orientation and gender identity (SOGI), disability, culture, nationality, race, beliefs, or lifestyle in personnel evaluations for the recruitment and promotion of faculty members. Keio University also promotes gender equality.
